

# MITRAGYNINE (KRATOM) DRUG TEST (URINE)

---

## **DESCRIPTION**

Mitragynine is the main psychoactive substance found in extracts of the plant *Mitragyna speciosa*, more commonly known as kratom. The **Mitragynine (Kratom) Drug Test (Urine)** will identify the presence or absence of mitragynine (kratom) in a urine sample.

This test requires a standard urine sample that can be collected at the Any Lab Test Now store location of your choice. It may be ordered alone or as an add-on to any other urine drug testing panel. All urine samples are collected and sent to the laboratory using strict chain of custody procedures that protect the identity and integrity of the specimen.

As a laboratory-based test, this test includes a screening test for the presence of mitragynine. Positive screen results are automatically sent for additional confirmatory testing by GC/MS or LC-MS/MS. Confirmatory tests will conclusively identify the presence of mitragynine in the sample and the amount. Screening and confirmatory tests are always conducted separately in order to prevent contamination and ensure accurate results.

Current information suggests that mitragynine remains detectable in urine for as long as 7 days after the most recent use or exposure. A confirmed positive result is considered evidence of use or exposure in that time period.

Tests for mitragynine may be available in other specimen types. Contact your local Any Lab Test Now for more information.

This test is intended to identify recent use of the following:

- Mitragynine (Kratom)

## **IS KRATOM LEGAL?**

Mitragynine (kratom) is not currently regulated under the Controlled Substances Act. However, it has been banned in several states. The DEA currently lists kratom as a “Drug and Chemical of Concern.”

## **WHY DO I NEED THIS TEST?**

### **For Consumers:**

The **Mitragynine (Kratom) Drug Test (Urine)** is recommended for consumers seeking a drug test for personal knowledge. It is also recommended for consumers who are concerned about suspected abuse or misuse of kratom by a friend or family member, including teenagers.

### **For Law Enforcement Agencies or Substance Abuse Monitoring Programs:**

The **Mitragynine (Kratom) Drug Test (Urine)** is recommended for agencies or programs responsible for monitoring individuals who are required to abstain from substance use.

## **WHAT DO I NEED TO DO TO PREPARE?**

Drink 8-12 oz. of fluid 30 minutes prior to the test.

## **IS IT SAFE TO TAKE THIS TEST IF I AM PREGNANT?**

Yes.

## **WILL CERTAIN FOODS/DRINKS MAKE THE TEST APPEAR POSITIVE?**

No.

## **DO I NEED TO MAKE AN APPOINTMENT?**

No. You can walk in for same-day testing. We make it easy by offering work-friendly store hours.

## **HOW LONG WILL IT TAKE TO GET MY RESULTS?**

Negative drug test results are available within 24-48 hours. Allow additional time for confirmation testing to be completed if necessary.

## **WHO HAS ACCESS TO MY RESULTS?**

Drug test results always belong strictly to the donor, except in the case of a minor child or an employer or court-ordered drug test. The donor may also provide written authorization for test results to be provided to one or more third parties, if necessary.

## **IS A DOCTOR'S ORDER REQUIRED?**

No. Drug testing does not require a doctor's order to be performed.

## **WHO CAN I CONTACT IF I HAVE QUESTIONS ABOUT MY RESULTS?**

Drug testing results should be discussed with your primary care physician.
